Nabonswendé Regis Epiphane ZONGO

Cybersecurity Engineering Student, SOC / Blue Team oriented — Auditing, PKI & System Hardening

International University of Rabat (UIR) — Cybersecurity Engineering Program, 5th year
epiphanezongo23@gmail.com | +212 6 64 13 90 96 | LinkedIn | GitHub | Portfolio | Credly | Salé / Rabat, Morocco

End-of-studies internship in cybersecurity — available from January 2027

PROFILE

Fifth-year cybersecurity engineering student at UIR, focused on operational defense: Linux system hardening, authentication log analysis and evidence-based verification. Experience in black-box web penetration testing (OWASP), PKI for industrial environments and AI applied to threat detection. Used to writing clear deliverables (reports, remediation plans).

SKILLS

Auditing & Penetration Testing: Black-box web penetration testing, OWASP Testing Guide / Top 10, Burp Suite, OWASP ZAP, Nmap, CVE research
Hardening & Log Analysis: Linux hardening, authentication log analysis, vulnerability and false-positive triage
PKI & Cryptography: X.509 PKI (EJBCA, CMP, certificate authorities), OPC UA certificate management, AES, RSA
Systems, Networks & Cloud: Linux (Ubuntu, Kali), Windows Server, Active Directory, TCP/IP, Firewall, Cisco, Docker, AWS
Development & AI: Python, C, PHP/Laravel, FastAPI, Git/GitHub, NLP

PROFESSIONAL EXPERIENCE

Security Audit Intern (Penetration Testing) *10/08/2026 – 10/09/2026*
4D Business Consulting (4DBC) × IFGICT — Rabat

- Conducted 2 black-box web application security audits following the OWASP Testing Guide / Top 10: multiple findings rated by severity
- Automated scanning (OWASP ZAP) and manual verification (Burp Suite): vulnerability triage and false-positive elimination
- Documented each finding (evidence, impact, remediation recommendations) in 2 technical reports

Industrial Infrastructure Cybersecurity Intern *08/07/2026 – 08/08/2026*
DATAPROTECT — Business Unit Critical Infrastructure Cybersecurity

- Deployed and validated, as a pair, a PKI (EJBCA) integrated with a Global Discovery Server for OPC UA certificates
- System-level diagnostics and identification of a functional defect in the GDS, with technical evidence and recommendations
- Built an overall validation matrix and analyzed lab ↔ production gaps (HSM, redundancy, monitoring)

Research Intern — Detection & AI Applied to Cybersecurity *29/06/2026 – 31/07/2026*
International University of Rabat (UIR) — Salé

- Research project on automated detection of disinformation content; data annotation (Label Studio) and exploratory analysis
- Model comparison (TF-IDF vs fine-tuned DistilBERT), statistical validation and FastAPI + React demo

Web Development Intern *07/2025 – 08/2025*
SEOCOM — Marrakech

- Independently developed a complete real-estate management application (Laravel/MySQL, MVC) in 4 weeks, after self-training
- Multi-role access (admin, agent, client, owner) with access control and protection of sensitive data (transactions, contracts)
- Multi-criteria search, dashboards, internal messaging, document automation and reporting

ACADEMIC PROJECTS (link)

Enterprise OS Security Environment — team project (5 students) *Windows Server · Ubuntu · Kali*

- Windows Server / Active Directory, Ubuntu and Kali lab; my role: Linux administrator (installation and configuration of the Ubuntu server)
- Server hardening: key-based SSH, password policy, Fail2Ban, shared-folder permissions
- Authentication log analysis, then team re-testing of the attacks to validate the protections

Zigbee Protocol Security Analysis (IoT Simulation) *C++ · Arduino · Proteus*

- Built a smart-home simulation environment (Proteus/Arduino): coordinator, LM35/PIR sensors, attacker node
- Simulated attacks (replay, spoofing, command injection, DoS), then designed countermeasures (authentication, AES-128, anti-replay)

Cloud Attendance — Facial Recognition Attendance System *Microsoft Azure*

- Serverless Azure architecture (Python Functions, Face API, MySQL, Blob Storage, SendGrid) with a React web interface
- Automated pipeline: face detection (Face API), local identification (DeepFace), PDF report and email delivery

CERTIFICATIONS (2026) (link)

Systems & offensive security: Cisco Ethical Hacker · Red Hat System Administration I & II (RH124, RH134)
Critical infrastructure, cloud & risk: OPSWAT Introduction to Critical Infrastructure Protection · OPSWAT Cybersecurity Fundamentals Associate · AWS Academy Cloud Security Foundations · Introduction to EBIOS Risk Manager (Club EBIOS)

EDUCATION

International University of Rabat (UIR) — Salé, Morocco *2025 – Present*
Cybersecurity Engineering Program (5th year)

École Marocaine d'Ingénierie (EMG) — Rabat, Morocco *2024 – 2025*
Computer Engineering Program

CPGE La Salle — Ouagadougou, Burkina Faso *2022 – 2024*
Preparatory Classes for Engineering Schools — Mathematics & Physics (MP)

LANGUAGES

French: Fluent | English: Intermediate (technical)
